Program no____12____

Program Title_____ Vibration motor_____

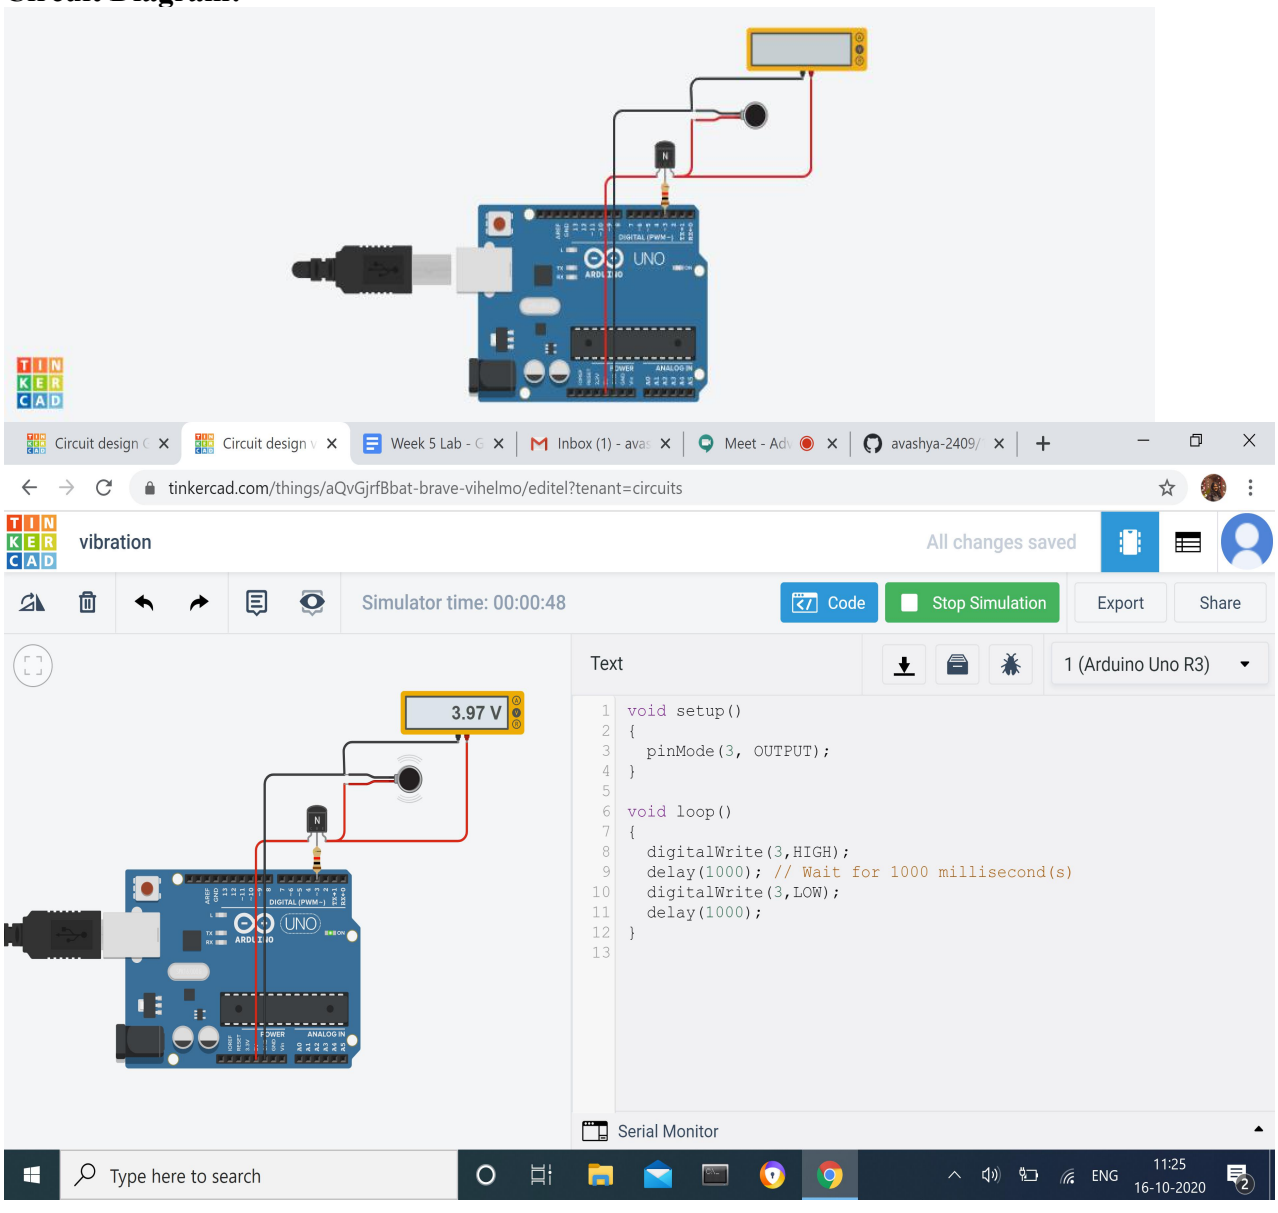
Aim:

Vibration motor must vibrate.

Hardware Required:

- Arduino Board
- NPN Transistor
- Vibration moor
- Resistor
- Multimeter

Circuit Diagram:



Code:

Experiment 12: Vibration Motor -

```
void setup()
{
pinMode (3, OUTPUT);
}
pin Void loop()
{
digitalWrite (3, HIGH);
delay (1000);
digitalWrite (3, LOW);
delay (1000);
}
```

Observation /Output:

Vibration motor will vibrate.
